

# WE HAVE YOU COVERED

When public health is at stake, every spot matters.

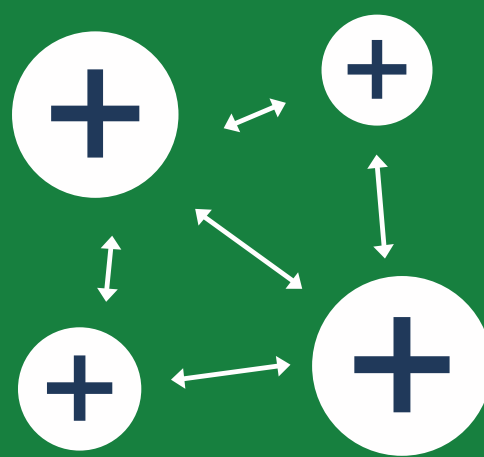

Victory Innovations electrostatic sprayers give you the confidence of complete disinfectant coverage on all high-touch surfaces.

## STICKS

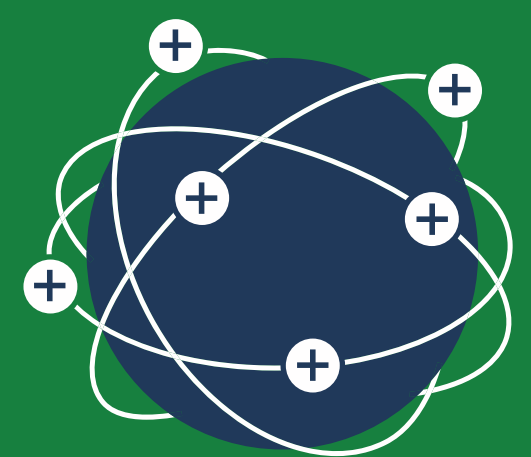

Electrostatic sprayers charge the disinfectant solution's particles, driving the disinfectant directly to surfaces.

## SPREADS

The positively charged particles repel each other like magnets, spreading evenly across the sprayed surface.

## WRAPS

Charged particles wrap around curves and reach into hard-to-clean and easily missed corners and crevices.

## EXTEND YOUR CLEANING REACH

Disinfect every square inch with electrostatic sprayers from Victory Innovations.
